# WASTE MATERIALS TESTING IN SUPPORT OF REGULATORY DEVELOPMENT FOR INDUSTRIAL, COMMERCIAL, AND INSTITUTIONAL BOILERS

## Preface

---

This document was prepared by Midwest Research Institute (MRI) for the U.S. Environmental Protection Agency (EPA) under EPA Contract No. 68-D-98-027, Work Assignment No. 2-01 (continuation of work performed under Work Assignment No. 1-08). Mr. Terry Harrison is the EPA Work Assignment Manager. In this report, MRI presents a description of the sources sampled, the sampling and analysis procedures, quality assurance and quality control activities, reporting and data reduction, sample and data handling procedures.

This document contains one technical volume entitled, "Waste Materials Testing in Support of Regulatory Development for Industrial, Commercial, and Institutional Boilers" (250 pages).

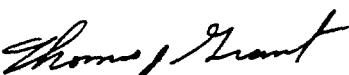

The test program was conducted in MRI's Applied Engineering Department under the leadership of Mr. John Hosenfeld, Work Assignment Leader and Program Manager, who will provide oversight to technical and administrative aspects of this work assignment.
